EDUCATION

University College London

PhD Student in Security and Privacy

Feb. 2025 – Present

London, UK

Focus: adversarial security of learning based systems under adaptive attackers, with emphasis on robustness drift and long term system failure in real world deployments.

Supervisor: Dr. Anna Maria Mandalari

University College London

Master of Integrated Machine Learning Systems

Sep. 2023 – Dec. 2024

London, UK

Grade: Distinction

Modules: applied machine learning, Internet protocol networks, security & privacy, natural language processing

Thesis: Distributed AI intrusion detection system with enhanced privacy

Sichuan University

Bachelor of Telecommunication Engineering

Sep. 2019 – Jun. 2023

Chengdu, China

Grade: 3.7/4.0

Modules: signal processing & information theory, computer networks, machine learning, advanced mathematics

PROJECTS

LANTERN: Diagnosing Web Intrusion Drift under Evolving Attackers

Feb. 2025 – Nov. 2025

Developed an adaptive intrusion detection framework using large scale honeypot data supported by the Global Cyber Alliance(GCA) focusing on dynamic real-time web traffic monitoring and robust drift aware machine learning.

Catching Hackers by Watching Watts: A Measurement Study of Power-Only Attack Detection on Consumer IoT Devices

Mar. 2025 – Dec. 2025

Built an energy aware IoT intrusion detection framework using 33 smart devices with Raspberry Pi based attack executor combining machine learning with network and power measurements for resilient threat detection.

Understanding Adversary Persistence through Attack Chain Modelling

Jan. 2026 – Present

Built a longitudinal adversary behaviour modelling framework from Internet facing services to reconstruct attack chains and uses LLMs with structured abstractions to emulate evolving attacks and study persistence and drift over time.

Distributed AI Intrusion Detection System with Enhanced Privacy

Master's Thesis

Developed a distributed ML-based intrusion detection framework integrating federated learning and differential privacy to enable secure, privacy preserving network attack detection.

RESEARCH AND PROFESSIONAL ACTIVITIES

Member, SAFENETIoT LAB, University College London.

Collaborations, GLOBAL CYBER ALLIANCE, INFOBLOX, INRIA, NEW YORK UNI, YOKOHAMA NATIONAL UNI

Speaker, RIPE 90 Meeting, Lisbon, Portugal.

Speaker, The Coseners Next Generation Networking Workshop, Abingdon, UK (Award Nomination).

EXPERIENCES

University College London

Teaching Assistant

Sep. 2025 – Present

London, UK

ELEC0032 Networking Systems, ELEC0138 Security and Privacy

Siemens Healthineers Ltd.

IT Cloud Intern

Sep. 2024 – Dec. 2024

Shanghai, China

Azure cloud-based document automation, AI service evaluation, and resource optimization.

AWARDS & SCHOLARSHIPS

UCL Doctoral Studentship, University College London – 2025–2029

Outstanding Graduate – 2023, Comprehensive Scholarship – 2020–2022, Sichuan University

Mathematical Modeling Contest – 2022, Internet+ Innovation and Entrepreneurship Competition – 2021, First Prize
