## EDUCATION

### University College London

*PhD Student in Electronic and Electrical Engineering*

**Ongoing**

*London, UK*

**Focus:** Internet Measurement, Adaptive Network Monitoring, Security & Privacy, and Robust Drift Resilience

**Supervisor:** Dr. Anna Maria Mandalari

### University College London

*Master of Integrated Machine Learning Systems*

**Sep. 2023 – Dec. 2024**

*London, UK*

**Grade:** Distinction

**Modules:** Applied Machine Learning, Internet Protocol Networks, Security & Privacy, Natural Language Processing

**Thesis:** Distributed AI Intrusion Detection System with Enhanced Privacy

### Sichuan University

*Bachelor of Telecommunication Engineering*

**Sep. 2019 – Jun. 2023**

*Chengdu, China*

**Grade:** 3.7/4.0

**Modules:** Signal Processing & Information Theory, Computer Networks, Machine Learning, Advanced Mathematics

## PROJECTS

### LIVID: Adaptive Drift Aware Intrusion Detection for Dynamic Web Traffic

**Feb. 2025 – Present**

Developed an adaptive intrusion detection framework using large scale honeypot data supported by the Global Cyber Alliance(GCA) focusing on dynamic real-time web traffic monitoring and robust drift aware machine learning.

### PowerGuard: Energy Aware IoT Intrusion Detection Framework

**Mar. 2025 – Present**

Built an energy aware IoT intrusion detection framework using over 35 smart devices with a Raspberry Pi based attack executor combining machine learning with network and power measurements for resilient threat detection.

### Adaptive Threat Intelligence from Passive DNS Telemetry

**Nov. 2025 – Present**

Developed a DNS-based threat intelligence framework in collaboration with Infoblox integrating passive DNS telemetry with web traffic analysis for adaptive detection of malicious domains and data exfiltration.

### Distributed AI Intrusion Detection System with Enhanced Privacy

**Master's Thesis**

Developed a distributed ML-based intrusion detection framework integrating federated learning and differential privacy to enable secure, privacy preserving network attack detection.

## RESEARCH AND PROFESSIONAL ACTIVITIES

Member, SafeNetIoT Lab, University College London.

Collaborations with Global Cyber Alliance, Infoblox, Yokohama National University, and New York University Abu Dhabi.

Speaker, RIPE 90 Meeting, Lisbon, Portugal.

Speaker, The Coseners Next Generation Networking Workshop, Abingdon, UK (Award Nomination).

## EXPERIENCES

### University College London

*Teaching Assistant*

**Sep. 2025 – Present**

*London, UK*

ELEC0032 Networking Systems, assisted in lab supervision, coursework guidance, and grading for postgraduate students.

### Siemens Healthineers Ltd.

*IT Cloud Intern*

**Sep. 2024 – Dec. 2024**

*Shanghai, China*

Azure cloud-based document automation, AI service evaluation, and resource optimization.

## AWARDS & SCHOLARSHIPS

UCL Doctoral Studentship, University College London – 2025–2029

Outstanding Graduate, Sichuan University – 2023

Comprehensive Scholarship, Sichuan University – 2020–2022

First Prize of Mathematical Modeling Contest –2022

First Prize of Internet+ Innovation and Entrepreneurship Competition – 2021
